SUMMARY

Full Stack Developer with 2.5+ years building production SaaS applications and real-time platforms used by active users. Specialize in Next.js, TypeScript, and Node.js – with hands-on experience integrating Anthropic and Gemini AI SDKs, architecting event-driven backend systems with Inngest, and delivering sub-100ms real-time features using Redis and Socket.IO. Track record of shipping end-to-end products: from collaborative document editors to AI coding platforms to full e-commerce stores with payment and shipping integrations.

WORK EXPERIENCE

(DEC 2023- APR 2024)

BPR NETWORK INDIA PVT LTD

Frontend Developer · Patna, Bihar, India

- Led frontend development for 6+ product modules in React.js, building a reusable component library that reduced UI development time across teams
- Cut page load time by ~35% through lazy loading, API call optimization, and eliminating redundant React re-renders
- Migrated 2,000+ lines of legacy jQuery to modern React, reducing bug surface area and improving long-term maintainability
- Co-designed 8+ REST API contracts with .NET backend engineers, standardizing request/response schemas and cutting integration bugs significantly
- Established component-level documentation standards and led code reviews, accelerating onboarding and improving code quality

Oneando company

(MAY 2024- PRESENT)

Full stack developer . Mumbai, Maharashtra, India

- Designed and shipped 5+ production SaaS applications using Next.js 14/15 and TypeScript, serving real users end-to-end
- Built 10+ REST API endpoints covering authentication, file storage, and real-time data sync using Node.js and Express
- Reduced real-time feature latency to under 100ms by implementing Redis pub/sub with Socket.IO for live collaboration features
- Integrated Anthropic and Gemini AI SDKs to build an inline coding agent, reducing manual code lookup time by ~60%
- Improved async job reliability by implementing retry and cancellation pipelines using Inngest for background task processing
- Boosted media delivery speed by 40%+ by migrating static assets to Bunny CDN with optimized caching and storage policies

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5
- **Styling:** CSS3, Tailwind CSS, Sass, Bootstrap
- **Frameworks:** Next.js 14/15, React.js, Express.js
- **Backend:** Node.js, REST API Design, Inngest (event-driven)
- **ORM:** Prisma, Drizzle
- **Databases:** PostgreSQL, MySQL, MongoDB, NeonDB, Convex
- **Auth:** Clerk, Twilio, JWT
- **Real-Time:** Socket.IO, Redis, LiveKit, Liveblocks
- **AI/ML:** Anthropic SDK, Gemini API, AI SDK (Vercel)
- **Payments:** Razorpay, Shiprocket
- **Cloud/Storage:** Bunny CDN, Uploadthing, Vercel
- **Monitoring:** Sentry, Git, GitHub

EDUCATION HISTORY

Bachelor of Computer Application (BCA 2021-24)

Aryabhata Knowledge University, Patna
, Bihar, India

Intermediate / Class 12th (2021)

Purnia College, Purnia, Bihar, India

Matriculation / Class 10th (2019)

Sarwaily High School, Purnia, Bihar, India

CERTIFICATIONS

- Back End Development and APIs – freeCodeCamp
- Relational Database Certification – freeCodeCamp
- Meta Front-End Developer Professional Certificate – Coursera / Meta
- Building Systems with the ChatGPT API – DeepLearning.AI
- Pair Programming with a Large Language Model – DeepLearning.AI

FEATURED PROJECTS

Polaris : AI Coding Platform | [Live preview](#)

Shipped a production AI-powered IDE supporting live coding sessions with multi-model AI assistance (Claude + Gemini), in-browser code execution via WebContainer, and GitHub import/export for Pro users.

- Built full-stack coding workspace using Next.js, Clerk for auth, and Convex as the real-time backend database
- Implemented reliable background job pipelines using Inngest with retry and cancel workflows, reducing async failures
- Integrated Claude and Gemini APIs for context-aware inline code suggestions and completions
- Enabled zero-setup in-browser preview using WebContainer, removing the need for local dev environment

FDEV Docs : Collaborative Docs Platform | [Live preview](#)

Built a production-grade Google Docs alternative with real-time multi-user editing, org-scoped access control, and threaded comments – conflict-free concurrent edits handled via Liveblocks CRDT.

- Developed real-time collaborative editor using Liveblocks, supporting live cursors, presence indicators, and mentions
- Built threaded comments, notifications, and @mention system for team communication within documents
- Implemented full-text search and document management using Convex as the backend
- Added organization-based access control with role-scoped permissions using Clerk

NAJAK CLOTHING – E-commerce Platform | [Live Preview](#)

Delivered a fully functional fashion store with product catalog, admin CMS, Razorpay payment integration, Shiprocket shipping, and coupon system – live in production.

- Built full-stack e-commerce platform using Next.js and MongoDB with product search, filters, and cart
- Integrated Razorpay payment gateway with server-side verification to prevent fraudulent orders
- Implemented Shiprocket API for automated order fulfillment and real-time shipment tracking
- Built admin dashboard for managing products, orders, users, and coupon codes
